FURTHER DECLINE AFTER BRIEF HALT

Period of Desultory Resistance in Early Morning Soon Gives Way.

EVIDENCES OF LIQUIDATION

Much Made by Sellers of Report On the Standard Oil Investigation-Money Steady.

NEW YORK, January 28.—The de-cline in prices of securities was resumed in the stock market to-day, after a period of desultory resistance. The in-different demand, which became mani-fest at any rise in prices, and the ap-prehension that additional liquidation remained to be effected, prompted the renewed selling by professional opera-

remained to be effected, prompted the renewed selling by professional operators.

There were evidences of liquidation here and there. As a motive for the selling, much was made by the sellers themselves of the report of the Interstate Commission, embodying the results of its inventigation of the Standard Oil Company, and transmitted to Congress. The substance of the report was not unknown to Wall Street any more than was the similar report transmitted last week on the Eastern coalcarrying railroads, but the publication of the reports makes an impression on inancial sentiment as cumulative evidence of the scope of the government activities against corporation abuses. This influence was supplemented also by the circulation of runors of further examinations to be expected from the President looking to an extension of the commission's inquiry into railroad properties. There were minor incidents in the day's events to keep this point of view prominent, such as reports that the course of the iron market indicated that the cream was off the iron and steel trade, or the receipt of statements of railroad net earnings for December, showing a uniform tendency towards decrease from last year's level, owing to the large increases in operating expenses. Rates for time money advanced again to-day. Government fiscal operations are against the money market again, the subtreasury having already absorbed \$2.482.000 of the new banking week. Discounts hardened also in London, in spite of large gains in cash by the Bank of England. The decline gathered force as it progressed, and the closing was very weak and active. Bonds were irregular. Total sales stocks, 1,047,200 shares.

AND THE SNOWFALL

AND THE SNOWFALL

The country produce block of Cary Street
was dull yesterday. "We are snowed under,"
said a prominent commission merchant. The
receipts are always small on Mondays; they
were especially so yesterday. Everything
was coars and the fearer are held of not
a little, and so very little business was done
on
the market was firm, and everything that
was on sale brought outside figures, for the
demand was a little in excess of receipts.
Eggs were a cent higher than on Saturday,
and there were not enough on the market
to meet the active demand. Fowls of all
kinds were steady, but strong at former
quoistions.

The commission men are looking for better receipts to-day, and the demand being
active enough they expect good business this
morning.

DEPENDS ON WEATHER

of operations in the leaf tobacco market. Of course, there were no receipts of losse leaf yesterday by wagon for this morning's breaks, but there is a good deal of the good sun-cured stock in the warehouses that has come in by rail, and if the weather conditions are at all favorable to-day a goodly quantity of the weed will be put out on the warehouse floors. Thereals plenty of tobacco here to make large large enough breaks, but it is not always a good thing to try to handle the weed in the face of unfavorable weather conditions. There may be large breaks this morning, or there may not be hereals this morning, or there may not be All depends on the condition of the thermometer at sunrise.

ASHLAND, VA., January 28.—The stresian wells now being bored here on the property of the Ashiland Gas, Sewer and Water Company have now reached a depth of over two hundred feet, notwithstanding the fact that the wells are to be unusually large, and the drilling is going on through very hard rock. The work is under the daily supervision of Mr. John D. Harris, of the company. The company is taking a sample of the borings at each ten feetthese borings are put in glass tubes graduated so that one inch on the tube will equal ten feet in actual depth of the well. These will be mounted-and given to the Department of Chemistry of Randolph-Macon College for analysis and educational purposes. The work of laying the water mains will commence as soon as the pipe arrives here.

The ladies of St. James's Episcopal Church have arranged to have an oyster supper here on the 13th of Fobruary. The proceeds will be devoted to the discharge of the debt upon the church rectory.
